No. 27

FOUND DYING ON THE TRAIL.

The N.W.M.P. Received Word this Morning that a Freighter had been Found in a Dying Condition near Morinville.

Word was brought to the N. W. M. P. barracks here this morning that a freighter had been found dead on the Morinville trail beyond St. Albert, and that his companion was missing. A patrol was at once despatched to Morinville to investigate the case and should return this afternoon.

Inquiries in the city and from Morinville by telephone reveal that the name of the unfortunate

man was Geaudion and that he was found during the evening or night on the road in a dying condition. He was taken to Morinville but expired in a few minutes. Another freighter who was with him and who was reported missing was found this morning in a house by the trail.

The particulars of the affair will not be known until the return of the police.

MOUNTED POLICE

WILL NOT BE ABOLISHED

Rumored extinction of the force proves baseless. Their pay increased.

Ottawa, Feb. 2.—In the House to-day Premier Laurier said it would be difficult to get along without the

Mounted Police. Even if provincial autonomy were given to the west the police would be wanted to prevent smuggling across the boundary and in connection with the Indians. Foster agreed with this stating that it would be very many years before we could get along without the police. The bill increasing the pay of the mounted police was read third time.

WESTERN ATTITUDE TOWARDS AUTONOMY

R. D. Bennett, M. L. A. of Calgary has recently returned from a visit to the East and interviewed regarding to negotiations tending toward Provincial Autonomy is reported to have said:-

"Nothing in connection with this great cause is all 'right' stronger comment among eastern politicians than the seeming apathy of western people. Contrast the attitude of the residents of Indian Territory, New Mexico and the other territories of the United States now about to be made states with that of the residents of Alberta. As I sit and talk to the people in the east a public meeting and discussion, newspaper controversy and intense public interest. On the other, apparent indifference.

It does not however appear to have occurred to either interviewed or interviewer, that the lack of public interest in the matter is an argument against hastening the advent of provincial status and the tax collector.

THE WESTERN FARMER AND THE B.C. LUMBERMAN

A few months since an attempt was made by the advocate of a high protective tariff to persuade the western farmer that his products were being driven out of the markets of British Columbia by the imported produce of American farms and on this story the argument was founded that if the farmer would submit to a further tax on himself buy the manufacturers of the Dominion the duties on the articles produced by him would also be raised. But the farmer thought he was contributing enough to the manufacturer under present conditions and turned down the high tariff candidates with a deliberation which was conspicuous.

The Winnipeg Commercial which has a tender regard for the afflicted manufacturer has changed tactics and goes after the farmer in the following fashion:-

"There is, of course, nothing surprising in the fact that farmers in certain sections of the West are signing petitions against the production of the lumber industry in British Columbia by the imposition of a duty on rough lumber coming from the States. The farmer is essentially local. His point of view is limited. He has not the perception of the country's interests as a whole the business man has, nor does he realize how dependent upon the prosperity of the whole are the various parts. In short, he is selfish, in this instance, particularly so. It is striking that the produce which he sells to the Pacific Province is heavily protected, that is, nothing as far as inducing him to make any more. It means money in his pocket, and he needs the money. If he finds he can get it from his fellow countrymen across the mountains so much the worse for them, but as for making any return, why the thing is an outrage. 'Hurry up to Ottawa with a petition,' he says. 'or I may find myself self compelled to do my proper share in developing this great Dominion of which I pretend to be so proud and alert. Those who have invested great sums in an important industry an opportunity of making it yield a fair profit, and prevent that industry, which employs many men who buy my butter and eggs, from being temporarily driven to the wall by the product of many thousands who don't eat my butter and eggs, who only want my money, and have not the slightest intention of building up Canada. It's no race,' says he, 'most logic and public spirit is a mere.'"

"All hail the farmer. The West wants him. Even in his selfishness he is doing good work. But just as much, so wants the West.

ROSS BROTHERS LIMITED

ARE THE SOLE AGENTS
IN EDMONTON FOR THE

MONARCH RANGE...

There is no question as to what this Range can do for its durability, as thousands and thousands of them are in use on this continent, and so far as we have been able to learn no fault has yet been found with them.

The main body of this Range is built up of sheet steel, and all the other parts that require to be cast are malleable iron. The top is ground to a bright steel finish, and is so heavy that, no matter how long or how hot you heat it, you cannot make it warp or get out of shape.

You will notice that the oven has a drop door, and the above cut illustrates the strength of this door, as any man can stand on it when it is open without straining it in the least. This will give some idea of the strength of the Stove, as all its parts are as strong as this cut of the oven door open with the salesman standing on it would convey to you.

It is a wonderful baker, a very quick heater, and its water front is so constructed that it will heat water nearly twice as quick and on a much less quantity of fuel than any other Range now on the market.

The purchaser of a MONARCH RANGE insures a satisfaction that cannot be measured in dollars and cents, for at the end of ten years' use it will operate as easily and be just as good as when first started.

Remember the MONARCH when you want to purchase a Range.

Ross Bros. Ltd.

The Western Farmer and the B. C. Lumberman.

Continued from page 2

and once located here he wants the earth. Is it nothing that he fills the most productive wheat growing lands beneath the sun? Is it nothing that pioneers of industry are striving to develop for him a home market, in which he can rely upon being able to profitably dispose of his goods, with a minimum of trouble and transportation expenses? Is it nothing that there is a duty on the products of the farm which protects him from less means while by foreign competition. Has he to make his country no other return for all this, than to wax fat himself?

"Perhaps that autocrat of autocrats, the Western farmer, may desire to argue the point. He may cite the fact that timber limits are being taken up in British Columbia and some money being invested in plantations, as a proof there must be money in the business as it is, or expansion would not take place. Well, what of it? Those limits are being secured—and largely by capital from the States—against the time when lumber will be scarce. There are evidences of exhaustion of supplies across the border. Then as to the plants and manufacture. This is merely to fulfill the legal requirements of limit holding. Some plants are erected and some lumber manufactured; meanwhile the industry is a losing proposition. As little as possible is done, and what little is done makes the position of established concerns worse. It means straight loss of large sums of money and the retard of the sound development of the country."

"But the time is coming when the Western farmer may be sorry he adopted such selfish attitude in 1905. A few years will see a great change in the timber may of this continent. As the available supply decreases, limit holders will go slower in the production of lumber, and the farmer will not be able to rely upon internal competition and dumping from across the border to give him cheap houses and barns. When that time comes—and the indications are it will not be long—the generous and patriotic farmer will have a little appeal to make to himself. Complicity might lead him to petition for a law to compel the immediate marketing, and exhaustion of Canada's timber resources as tribute to his autocratic money bags. But the best will be on the other foot and it is likely he, or his children, if you will, will be compelled to pay dearly for the selfishness of the present."

There are some gratifying admissions to be noted in these vigorous paragraphs.

It is stated that farm products are "heavily protected". This is a different version from that of October last when the eve of the war was called upon to witness the slaughter of Canadian agriculture by the importation of American farm products.

It is admitted also that the produce of the North West finds its market in British Columbia. The former story was that of all places in Canada British Columbia was the one district in which under existing conditions the Canadian farmer was being crowded out of the market by the American farmer.

The acknowledgement is also made that the "cheap houses and barns" of the farmer are made possible by the entry of American lumber into Canada, in other words that were this lumber excluded the price of lumber to the farmer would be increased, in other words that the tariff on rough lumber is desired not merely to secure the Canadian market for the Canadian manufacturer, but to enable the British Columbia lumber man to meet \$2.00 per thousand more than the western farmer or his lumber. This frank admission from an unquestioned authority is very satisfactory and should settle the question for all time.

McLEOD RIVER SETTLEMENT.

Correspondence

A new settlement on the McLeod river. The settlement is about 38 or 40 miles from the Pembina river southwest at the mouth of the McLeod where it empties into the Athabasca. It is without a doubt the most picturesque place in Alberta, in fact it is a regular paradise with abundance of resources. There are thousands of tons of hay in the valley. G. T. survey crosses the river

where large numbers of people are squatting on land all the way between the McLeod and the Pembina river. There is considerable traffic over this trail this winter by land hunters, prospectors, trappers, and survey parties. The stopping houses along the trail are doing a fair business. Mr. Boss at the ferry has the house at the junction of the trail to the Slave Lake. He was forced to build an addition to his house and stable in order to accommodate the travellers. The wagon road is good to the McLeod river and large loads can be hauled any time of the year. On the north side of the McLeod there is from 10 to 15 miles of beautiful rolling prairie land, rich black loam ready for the plow.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory

Coal.—Coal lands may be purchased at \$10 per acre for soft coal, and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates, may obtain entry for mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$750 per annum for an individual, and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500 by 1500 feet by marking out the same with two legal corner bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$5.00.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims are generally 100 feet square, entry fee \$5.00, renewable yearly. On the North Saskatchewan river claims for either bar or bench, the former being 100 feet long, and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each, for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have or who may receive entries for bar diggings on bench claims, except in the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease, one dredge for each fifteen miles or fraction, will be sufficient. Rental, \$10 per annum for each mile of the river leased. Royalty at the rate of two and a half per cent, collected on the output after it exceeds \$10,000.

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty same as placer mining.

Placer Mining in the Yukon Territory.—Creek, gulch, river, and hill claims shall not exceed 250 feet in length measured on the base line or general direction of the creek or

gulch the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days. If the claim is within ten miles of a mining recorder's office, one extra day allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, \$10. Royalty at the rate of two and one-half per cent, on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of \$2. A claim may be abandoned, and another obtained on the same creek, gulch or river by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the Yukon Official Gazette.

Hydraulic Mining, Yukon Territory.—Locations suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more, may be leased for twenty years, provided the ground has been prospected by the applicant or his agent, is found to be unsuitable for placer mining, and does not include within its boundaries any mining claims already granted.

A rental of \$150 for each mile of frontage and royalty at the rate of two and one-half per cent of the value of the gold shipped from the Territory are charged. Operations must be commenced within one year from the date of the lease, and not less than \$5,000 must be expended annually. The lease includes all base metals, quartz and coal, and provides for the withdrawal of unoccupied land for agricultural and building purposes.

Petroleum.—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 400 acres. Should the prospectors discover oil in paying quantities, and satisfactorily establish such discovery an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

ORDER RESTORED

IN THE RUSSIAN CAPITAL.

The Czar and a Committee of Ministers Formulate a New Plan and Remove Grievances.

London, Feb., 3rd.—Order appears to have been quite generally restored in Russia, the exception being in Poland. Even in Warsaw however there has been a return of almost normal conditions. A committee of ministers sitting at St. Petersburg has formulated and the Emperor has sanctioned a number of proposals looking toward the establishment of a senate upon the basis of closer connection with the throne, doing away with the administrative orders, suspending certain laws, and in other ways checking the evil that have arisen through the arbitrary acts of ministers and officials. The report that Maxim Gorky has been released is difficult of verification. If the rumor is true the author has probably been requested to leave St. Petersburg immediately. Both armies in Manchuria are waiting to spring on each other. Movements have been slight as extreme cold weather has suspended all operations.

May Boom Canadian Wheat.

Bulletin Special.

Washington, Feb. 3.—The U. S. Attorney General has rendered an opinion in which he holds that the backs may be allowed to draw flour made in part from imported wheat.

Winnipeg, Feb. 3.—The above decision may have a far reaching effect in Canada and may cause a jump of 10 cents per bushel on wheat in the west.

Militia Estimates Brought Down.

Ottawa, Feb. 2nd.—The militia estimates were brought down today. Sir Frederick Borden said that he hoped to see a cartridge factory which would manufacture explosives located near Ottawa and would also like to see the raw material for our ammunition manufactured in this country instead of imported. He suggested that a committee of both sides of the House meet with himself and the military council and all information would be given them as to our military position and military defenses. He had no information beyond what was in the press as to the Imperial intentions regarding Halifax and Esquimaux.

Lumbermen after the Government.

Bulletin Special.

Ottawa, Feb. 3.—B. C. lumbermen want a duty of \$2 per 1,000 feet on lumber from the United States. British Columbia regards the attitude of the Northwest as the greatest obstacle to this and before meeting the Government the lumbermen want to come to terms with the Northwest members.

Bought Island Railway.

Bulletin Special.

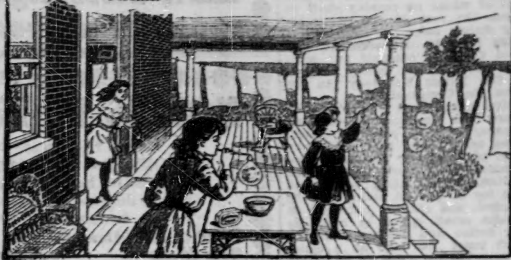

Victoria, Feb. 3.—Superintendent Marpole representing the C. P. R. and Hon. Jas. Danneberg have concluded the sale of the Esquimaux railway to the C. P. R. for \$1,000,000. This may take the terminal point from Vancouver.

The highest perfection in scientific soap making is reached in

Sunlight Soap

Each ingredient is tested, and each step in the manufacture carefully watched. The result is a soap possessing great cleansing power, yet perfectly harmless to fabric or hands. Try Sunlight.

Lever Brothers Limited, Toronto.

Any good rubbers will keep a woman's feet dry

The "CANADIAN" RUBBERS,

will keep them dry—

and shapely.

Closing the Gaps.

Bulletin Special.

Ottawa, Feb. 3.—MacKenzie and Mann are petitioning Parliament for power to connect the westerly lines with the eastern, chiefly the Great Northern or Quebec, and bring all their railway enterprises under one business management.

Telegraphic Briefs.

Bulletin Special.

Montreal, Feb. 3.—Fire did damage to the premises of the "Shareholder" a financial paper and caused a panic among 50 girls in the bindery and type setting rooms. All got out. The loss was \$20,000, insurance \$17,000.

Toronto, Feb. 3.—At the Canadian Press Association meeting here it was asserted that ten years from today the centre of journalism would be west of Winnipeg and the biggest papers will not be published in Winnipeg, Toronto or Montreal.

Ottawa, Feb. 3.—Karl Grey is sick with la grippe and Lady Sybil Grey with measles.

Winnipeg, Feb. 3.—In intermediate hockey the Rowing club beat Rat Putage 5 to 3, ending at Fort William, Mac Rochem of Winnipeg won the grand challenge.

Montreal, Feb. 3.—It is again persistently rumored that Premier Parent will be appointed on the commission of construction of the transcontinental railway.

MECHANICS AND LITERARY INSTITUTE OF EDMONTON

A general meeting of all friends and subscribers is called for Thursday, the 2nd day of February, 1906, at eight p. m. in the Council Chamber in the City Hall, to elect officers and transact such other business as may come before the meeting. A full attendance is particularly requested. Dated, the 27th day of January, 1906. Wm. Short, President.

SCAVENGER.

LEAVE AN ORDER AT THE FIRE HALL

CALGARY DEPUTATION.

Dr. Roukan was also added to the deputation. The following message was sent to the Premier:—

"The citizens of Calgary in mass meeting assembled tonight strongly protest against naming for provincial capital of new province any point competing for permanent capital. Delegation reaching Ottawa Monday, request interview."

At the mass meeting in Calgary on Wednesday evening the following resolution was adopted:—

"Resolved that a delegation of seven consisting of the Mayor, the President of the Board of Trade, and Messrs. C. A. Stuart, Dr. Stewart, W. M. Davidson, W. H. Cushing and Major Walker, proceed to Ottawa without delay to interview the cabinet and members of parliament for the purpose of endeavoring to have the government name a bill creating the new western province some place as the provincial capital of the said province that is not likely to be a competing point for the permanent capital leaving the question of final location to be decided by the legislature of the new province, and that the committee should if possible secure the co-operation of Messrs. P. Burn, J. S. G. Van Wart and Major Burns and that the city council is hereby requested to defray all necessary expenses in connection with the said delegation."

"And be it further resolved that the delegation use its influence to secure the location of the boundary line dividing the eastern and western provinces at such point as will be fair and equitable to each with a view to their development and the responsibilities which they will have to assume in working out their future, and if it is the intention of the government to define in the bill the electoral districts, that the delegation urge that such electoral districts be constituted with due regard to local conditions and population."

SURVEYING BASE LINES.

Under instructions from the Department of the Interior survey work has been done on the 15th, 16th, 17th, 18th, 20th, 21st and 23rd baselines during the past season and will probably be continued during the coming year.

B. J. Saunders, D. L. S., has a party surveying the 15th baseline westward.

Mrs. Costley, D. L. S., is in charge of a party running the 16th baseline westward.

A. Drenth's party are working westward on the 17th baseline.

The operations of these parties all began at the junction of the Athabasca trail with the different lines.

Mr. St. Cyr, D. L. S., has a party on the 19th baseline south of Lesser Slave Lake, running eastward and from the 6th Meridian to meet the line run by Bray's party last season.

J. N. Wallace who has been in charge of a party working on the 20th baseline is now on the road out to the city.

Mr. Selby's party ran the 21st baseline from the fifth range west of the 6th Meridian westward to the R. C. boundary, then went north along the 6th Meridian and began work running the 23rd line westward till work had to be suspended owing to scarcity of fodder for horses and other difficulties encountered. Mr. Selby is now in the city and returns north in March to continue the work.

WINNIPEG MARKETS.

From the Commercial—

Wheat—We quote current prices as established at the close of today's market as follows, viz: 1 northern, \$1.01 2 northern, 98c; 3 northern, 92c; No. 4 extra, 88c; No. 4 wheat 82c; No. 5 wheat 68c; feed wheat, 75c; No. 2 feed, 54c; spot or January delivery and the option market futures closed January, \$1.01; May, \$1.05 3-8; July, \$1.05 1-4c. All prices are for store in Fort William and Port Arthur.

Oats—No. 2 white, 32 1-2 to 33 1-2c; No. 3, 30c; feed grades 30c per bushel, in carlots on track, Winnipeg.

Barley—No. 3 barley, 28c per bushel No. 6, 37 to 38c, on track, Winnipeg.

WHAT COSTS MOST

WHOLE lot of people fancy the cigar business is a snap! They figure out that all you need is some cases of tobacco, a few cigar makers, and the name of some stage favorite or prominent man.

The quality of the filler does not interest them at all—the binder is beneath their notice—but the wrapper and the name is all important.

They can sell this kind of cigar at \$55.00 a thousand, give a gold watch into the bargain, and then make a good size profit.

The principal cost of Pharoahs is in tobacco—I buy the best filler in the world—a Cuban leaf—one I select myself from the best of the Manicuregna district, in the Province of Santa Clara—a Connecticut broad leaf as binder, the most expensive in the world—and I import a clear leaf Sumatra from Holland as wrapper.

I secure by this means a superb cigar, a fragrant, even smoker—very palatable—very superior to the ordinary run of cigars.

John Payne
GRANBY, P.Q.

None genuine unless branded **PHA-RO**

Use Only 1/4 Teaspoonful
of Armour's Extract of Beef for a cup of Beef Tea. Yes, some require a whole teaspoonful—but they are not Armour's.

ARMOUR'S Extract of Beef

Cramps

Serms odd that a remedy that cures rheumatism, neuralgia, sprains and bruises—will cure cramps. But it will. Hirst's Pain Exterminator cures pain wherever located. A teaspoonful internally—and a little rubbed on the stomach—quickly takes away the cramps.

Hirst's Pain Exterminator

is equally effective in checking Diarrhoea and all other Bowel Troubles. There's always a need for it in every home. A bottle on the medicine shelf saves many a doctor's bill.

"My mother has used Hirst's Pain Exterminator and says it is the best medicine in the world for Cramps in the stomach and Bowel Complaint."

MISS ROSIE GOOD OF GREENOCK says: "My mother has used Hirst's Pain Exterminator in the house. It is a wonderful medicine for Cramps, Rheumatism and Neuralgia."

25c a bottle. At all dealers.

THIS IS TRULY THE IRON AGE.

Some Pertinent Facts in Regard to Iron and Iron Mining.—The Returns to Shareholders from Iron Properties Greater than from any Other Class of Investment, The Iron Mines of The Edmonton Coal and Iron Mining Company Promise Much to the Owners and to the Prosperity of Edmonton and Northern Alberta.

We often hear the expression "the iron age," but few of us realize what this term actually means when applied to the present era, as it often is. In order to better grasp its meaning, and still further to appreciate to the fullest extent all that it entails, let us look back to the "Iron Age" of past history. In those early times when man was yet in his infancy, so far as education and civilization goes, when life meant a continued struggle for the supremacy of the race, in short, when his best efforts were limited to an extent which it would be impossible for us in our day to imagine, his sole ambition stopped short at the manufacture of a few crude household utensils and weapons of war and the chase. How different it is with us today! Not only are we equipped with cooking utensils and arms of the finest description but, what is still more to the point, we have subjected this all important metal—the greatest of all nature's gifts to her children—to our almost every need. Not only do we use iron and steel which we may call its offspring, for our houses, but we use it for the actual construction of our largest buildings and it is daily becoming more popular. Again, our bridges, railroads, waterways, subways, docks, shipyards, vessels, in fact all our great modern engineering feats and efforts would fail utterly were it not for the presence and the skillful adoption and use of this wonderful metal, iron.

It would not be too much to state that were we to eliminate the use of iron in its various forms from our present day commodities, not only would the commercial world be suddenly checked but we should gradually and surely drift backward to the starting point; the various branches of trade would have ceased, commercial enterprise would be a thing of the past and civilization would be a mere matter of history. Therefore viewing things from this the only proper light, the logical conclusion we must arrive at is that this twentieth century is the real iron age, the iron age of the past being merely the embryonic forerunner of the world's great future. Such being the case let us turn to the material side of the case and ask ourselves the question "since iron is practically the fundamental basis of our modern civilization and since it is used to such a vast and ever-increasing extent, how is the supply to keep pace with the demand?" Clearly the field is a large one and even the great iron mines now working are not so numerous as to be able to swamp the market at their present output. There is more demand today than there ever was for a good iron mine, and this is especially applicable to our own countries and sections of countries.

Speaking of our own country—this vast Canada—with its limitless resources in the form of minerals, timber etc., here we have a young country, a growing country, full of great prospects and with a vast future. Unhindered by the fogs and mists of uncertainty or gloominess are looms up before us in all her might. With outstretched arms she invites us to share her gifts and her future. Her dowry is a simple one, nor does she withhold it from those who have the wisdom to know her charms. Her dowry is of fine gold. Her ornaments are many and precious. Her will is of iron, and as surely her will controls her actions, so surely must her iron control her future. With this iron she will build her railways—the Grand Trunk and the Canadian Northern, albeit in themselves a vast undertaking being but an earnest of future and still greater enterprises. She must have also bridges, ships, machinery and the thousand and one other necessities which go to build up a large nation—which she will surely one day become. Think of this, to build up a nation! Glorious the upward meaning which this implies and ask yourself the question "How are we going to obtain all this iron which is needed?" The answer is simple. Either Canada must import all her iron and by this we include steel, or she must supply her own iron. Would we, knowing that we have fruit in our garden, go elsewhere to obtain it at a greater cost? It hardly seems feasible. Then let us pluck what we have ready to our hand, in other words let us take hold of the vast iron deposits which we know from the best authorities and can see for ourselves we possess. Let us work them, not indiscriminately throwing away money, but with careful consideration and with due regard to location and the probable measure of success which such location promises.

There are those who would say that the average percentage of iron

mines which are paying is small compared to the number of mines upon which large sums of money have been spent. Here again, notwithstanding the fact that although the number of failures in iron mines has been far less than that of any other mineral, we find a class of people who rely rather upon their own ideas of what should be, than upon the advice of experts who deal with the things that are. Such is the class who would, after losing money by their own careless speculations, decry any form of mining; who, in short impede the march of progress.

It has been said that in order to take an intelligent interest in the affairs of his country every man should study politics. How much more there should he not take an active interest in building up his country by studying its natural resources and assisting to develop them?

It almost devolves upon us as a duty, which we owe to our children and our children's children, this laying of the foundation stones of the future, and this being the age of iron it would seem that in that direction lies the work we have set ourselves to perform. One naturally asks "where am I to start and how?" We will consider the first part of the query fully, being guided by past experience and backed up by statistics, for these are the testimonials exacted from us by nature before we will yield up her stores in trust for future generations. Taking the iron belts in this continent of America we find that they have their defined limits and their directions as truly as the arteries in the human body. For instance if we find the branchial artery near our armpit and run across it again at our wrist we may safely conclude that it is the same artery, or lead as it would be termed in military parlance. It is not this design to bewilder the reader or prospective investor with a list of iron mines paying high dividends, nor do we sketch out a geographical chart of all the iron districts and leads on the American Continent, but the following example will serve to show the well high infallibility of mining operations where carried out on the lines above illustrated. We refer to the world famous iron mines of the Mesabi range in Minnesota, U. S. A. Throughout the entire length of this range in recent years there have been many valuable claims taken up and today some of them net an enormous income to those who were far-sighted enough to invest in them. One particular case is that of a gentleman who now rejoices in the sobriquet of "Iron King" of Duluth. About twelve years ago he purchased eight acres of timber land in the iron belt above named for the sum of \$300.00. After inspecting the timber he offered to sell his property for less than he had paid for it, but no one would buy it. Some two years after he discovered that the iron ores exposed on his land were valuable, and he sold the right to take the iron off his eighty acres to the American Steel Corporation, charging them 25 cents per ton for all the ore they took. This has netted him \$3,000,000.00. His income from this source alone is \$750,000 per day. Almost due north some 1000 miles from this Mesabi range lies an immense deposit of iron ore, the property of the Edmonton Coal and Iron Company of Edmonton. It is located near Edmonton in Northern Alberta not far from the Canadian Northern Railroad and close to the route of the Grand Trunk Pacific, besides which it is within eight miles of the Saskatchewan river which is navigable, and is connected by wagon roads to Edmonton.

Amongst other experts, Mr. Wm. Blakemore, member of Institute of Mining Engineers, England, has reported on this valuable property. He says that in his opinion the company has in this case a "most valuable asset and easily and quickly realizable, and it is more than likely from the character and occurrence of the deposit that the springs come from a stratified ore body below which could be disclosed by boring."

Alluding to a proposed expenditure of \$10,000.00 he writes: "Having had thirty years experience in locating and working various iron deposits, I have no hesitation in saying that this is available property and one which will justify the expenditure recommended."

The mineral deposits he finds by analysis consists of 45.2 per cent. of metallic iron from surface ore and as he further states, not only could it be used to produce an excellent paint oxide, for which a market could readily be found, but it could also be used in combination with other ores of smelting and iron and steel manufacture, a similar fact so successfully smelted at the Baker Range, Quebec province for many years.

Small wonder then that of all the valuable and immense property has created such a stir among mining circles in various parts, not only of this country but elsewhere.

No colic, no constipation,

Our HARDWARE STOCK

Is without doubt the best in Alberta, and we will be glad to show you that our prices are right and that we can save you money on all your purchases.

Yours for business,

REVILLON BROTHERS, LIMITED.

We Paid \$100,000

For Ligozone, Yet We Give You a 50c. Bottle Free.

We paid \$100,000 for the American rights to Ligozone; the highest price ever paid for similar rights on any scientific discovery. We did this after testing the product for two years, through physicians and hospitals, in this country and others. We cured all kinds of germ diseases with it—thousands of the most difficult cases obtainable. We proved that in germ troubles it always accomplishes what medicine cannot do. Now we ask you to try it—try it at our expense. Test it as we did; see what it does. Then you will use it always, as we do, and as millions of others do. You will use it, not only to get well, but to keep well. And it will save nearly all of your sickness.

Kills Inside Germs.

Ligozone is not made by compounding drugs, nor is there alcohol in it. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. This process has, for more than 20 years, been the constant subject of scientific and chemical research. The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill. The reason is that germs are vegetables; and Ligozone—like an excess of oxygen—is deadly to vegetable matter.

There lies the great value of Ligozone. It is the only way known to kill germs in the body without killing the tissues, too. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is almost helpless in any germ disease. It is this fact that gives Ligozone its worth to humanity. And that worth is so great that we have spent over one million dollars to supply the first bottle free to each sick one we learned of.

Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Ligozone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

Any physician or hospital not using Ligozone will be gladly supplied for a test.

Fever—Gall Stones
Quinine—Stomach
Dysentery—Diarrhea
Tumors—Cancers
Venereal Diseases
Women's Diseases
All diseases that begin with fever—all infectious diseases—all diseases that result in tissue destruction—all the results of impure or polluted blood. In nervous debility Ligozone acts as a vitalizing, reconstructing what no drugs can do.

50c. Bottle Free.

If you need Ligozone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and we will pay the druggist ourselves for it. This is our free gift, made to convince you; to show you what Ligozone is, and what it can do. In justice to yourself, please, accept it to-day, for it places you under no obligation whatever.

Ligozone costs 50c. and \$1.

CUT OUT THIS COUPON

For this offer may not appear again. Fill out the blanks and mail it to The Ligozone Company, 125-126 Wabash Ave., Chicago.

My disease is.....
I have never tried Ligozone, but if you will supply me a 50c. bottle I will take it.

Give full address—write plainly.

Any physician or hospital not using Ligozone will be gladly supplied for a test.

Sold on Merit

At all high-grade grocers.

DAILY SUBSCRIBERS

Will confer a favor by notifying the Office by phone or otherwise of any failure to deliver, so that explanation can be made and future failure guaranteed against.

TIMM, The Shoe Maker

Has a special repair shop 2 doors east of the Jasper House. Re-lining elastic in boots and repairing a specialty.

EDMONTON ALTA. CANADA

POPULATION, 1904.
CITY GOVERNMENT:

Mayor, K. W. MacKenzie; Aldermen, C. May, K. A. McLeod, W. H. Clark, D. R. Fraser, J. R. Boyle, T. Bellamy, J. H. Picard, W. A. Griesbach.

Conveniences:—Waterworks, sewer systems, telephone system, electric lighting system, all owned and operated by the city.

Board of Trade:—President, J. H. Morris, Secretary, F. F. Tims.

Immigration Officer:—C. W. Sutter.

Educational Institutions:—Public and separate schools, high school, Alberta College.

CHURCHES:—Roman Catholic, Anglican, Presbyterian, Methodist, Baptist, German Baptist, Lutheran, Salvation Army.

TRAIN SERVICE:—Leaves for Strathcona 7.45 and 15.30. Arrives from Strathcona 9.15 and 16.50.

LOCAL

—Train on time.

—The council of the board of trade met yesterday when a considerable amount of general business was transacted.

—A frozen water main at the corner of Jasper and Quebec avenues required excavation during the week.

—A meeting of the North Alberta Medical Association for the purpose of reorganization will be held tonight in the Council Chamber at 8.30 p.m.

—Plans are being completed for building a C. P. R. branch from Gold-
en, B. C. to Jaffray, on the Crow's Nest Pass road.

—The C. P. R. are starting a new town on the branch line fourteen miles east of Lacombe. The town site is being surveyed.

—The Calgary branch of the Western Canada Immigration Association has asked the city council to grant \$500.00 toward the purpose of the Association.

—Rev. D. G. McQueen lectured in the Methodist church last evening on "The influence of missionary life on the Nation." Owing to the cold night and the hockey match in Strathcona the attendance was not as large as it would otherwise have been. Messrs. Crowde, McLeod, Race and Caisley gave a quartette which was much appreciated music was also given by the choir.

—On the steamer Empress of Japan, which sailed last week from Vancouver for Hongkong, there were no fewer than 4,000 sacks of Canadian flour consigned to Japanese ports. It is thought that the exportation of Canadian flour to Japan will be heavy and that large consignments will be taken out by each departing Oriental liner. The Japan took out a large amount of American cotton for Shanghai, but of Canadian cotton she had little. She took out about a ton of Calgary butter consigned to Japanese and Chinese ports. An interesting shipment which went into the strong box of the Japan was one and a quarter ton of silver bullion from the Trail smelter for Khabal, where it will be minted in currency. The bullion was shipped in the form of bars.

—The steamer Empress of Japan sailed last Monday; the steamer Minnato, of the Great Northern line sailed from Seattle at 4.30 p.m. on the same day, five hours before her. The Canadian Pacific railway people claim that the white liner will reach Yokohama from Seattle six days ahead of the big Hill steamer, and that the Empress will have been ten days at Hong Kong before the Minnato arrives there. The Empress of Japan is the fastest vessel on the Pacific, having made the record run of ten days and ten hours between Victoria and Yokohama. The new Pacific mail liner Kure has the second time she having gone from Yokohama to San Francisco in ten days and fourteen hours. Much interest is being displayed by marine men in the race between the white liner and the new steamer.

—From the scene of the robbery of the train at S. Y. M. A. station, the office of the S. Y. M. A. has sent out of his arrest as reported in a Virden dispatch was not correct. Potter escaped from the criminal express at a point west of Virden. Consals, a former of Montreal, notified by wire to join in the chase, went to Virden on Friday morning's train.

Hiring a rig to struck northward and within four hours had his man in the tods. Coming to a shack near the roadside, which appeared to be deserted, he noticed footprints leading to the door which had not been obliterated entirely by the drifting snow. Trying the door he found it locked, putting his knee against it he broke in. Potter was inside and at once arrested. Provincial Constable Ross accompanied Constable Perrault in his trip, but he was not present at the arrest, as he was searching the outbuildings at the time. Potter, who is now at Stony Mountain doing a two-year term, is an old jailbird. He is now fifty-four years of age, and it is thirty-six years since he was first sent down for safe-cracking. This is his third appearance at Stony Mountain.

PERSONAL

E. Raymer is on an extended trip to Eastern cities.

S. C. Paton left this morning for Chicago and Toronto.

Mrs. W. McAdam and children have returned from visiting relatives in Calgary and Bowden.

STRATHCONA WON THE CUP.

Strathcona won the fourth game for the Peterson cup on their own ice last evening and the trophy crosses the river for the season. The score was 11 to 7.

The game was faster than the score indicates, Edmonton's weakness being in the defence. The play as a rule was clean but Wright of the Edmonton team received a severe injury from being checked. It is claimed he was crossed checked, the stick striking him in the forehead.
